

## Svikt

By Jonas Ib F. H. Jensen  
and David A. Rios

In cooperation with artist Jonas Ib Jensen we have initiated the project “Svikt” (malfunction). The project is based on our mutual interest in systems and in a discussion about mismatched and failing systems, i.e. systems that generate deviation or misstatement. In this project we explore failure in systems from a pragmatic and a terminological angle. Both the efficiency of a system and the definition of a failure are part of our discussion.

The potentiality of change is present in every work we have produced and often the possible permutations of the systems we create are contained and visualised in the works.
